I am an 'V'owel Revisited

You will be given a String. You have to find out how many vowels ('v') are there in the sentence. We will consider only 'v' as an vowel.

Input Format

First line contains a String, S.

Constraints

1 <= length of String (S) <= 50 S contains only lower case latin alphabet.

Output Format

Print a single integer, the total number of vowels in the given String .

Sample Input 0

```
bracuniversity
```

Sample Output 0

```
1
```

Sample Input 1

```
abcvvefgv
```

Sample Output 1

```
3
```
